

An Example LaTeX Document

Yuanyao Lin

December 22, 2024

Abstract

A simple little testing document to get accustomed to L^AT_EX !

Contents

1	Testing Sections	2
2	Math stuffs	3
2.1	Inline Math	3
2.2	Display Math	3
3	Numbered and Bulleted Lists	4

Golden Rule: Do not do anything manually if you can avoid it.
Often, L^AT_EX can do it, and can do it better than you can.

1 Testing Sections

blah blah backslashes

$$\sigma = \delta$$

2 Math stuffs

2.1 Inline Math

This is also known as: `"\(\)"` or `"im"` with SleepyMalc shortcuts

$$e^{i\pi} = -1 \text{ or } \tfrac{1}{2} \cdot 2 = 1.$$

2.2 Display Math

This is also known as: `"\[\]"` or `"dm"` with SleepyMalc shortcuts

$$\sum_{k=1}^n k^3 = \left(\sum_{k=1}^n k \right)^2.$$

3 Numbered and Bulleted Lists

This is an introduction to L^AT_EX's lists

This is a number list using the "enumerate" and \item environment name

1. yay i am in in a list

2. Nested as well

- (a) nested enumerate test.

This is a bullet list using the "itemize" environment name

- HELO
